SUMMARY

I'm a highly perceptive Web Developer with a passion for building and designing impactful digital solutions using **JavaScript, React HTML and CSS**. With a background in UX/UI design, Marketing & Project Management, I am dedicated to creating exceptional products that effectively incorporate complex business concepts, resulting in unique solutions that resonate with people. I take pride in showcasing a demonstrated track record of organization, problem-solving, and successful team collaboration. Outside of coding you can find me indulging in any and all artistic activities.

PROJECTS

The Film Factory

<https://ftw-project-four.netlify.app/>

- A React app made with other developers that allows users to discover foreign movies, users can search using their preferred movies as references and save their searches along with favorite movies for future reference
- **Link to GitHub:** <https://github.com/francella-toritse-wilson/the-film-factory>

Music Scape

<https://music-scape-app-main.netlify.app/>

- A React app that allows users to discover, explore, and engage with various music events, incorporates user authentication and gives users a unique experience
- **Link to GitHub:** <https://github.com/toritsevalerie/Music-Scape-App>

Pronia Project

<https://thunderous-pixie-3bebf4.netlify.app/>

SKILLS

JavaScript • React • HTML • CSS • SCSS •

Git & GitHub • Firebase • Responsive Design •

API's • Figma • Web Accessibility • Prototyping •

Paired Programming • Visual Design •

Project Scope Management • User Research •

Web Servers (HTTP • DOM)

EXPERIENCE

Product Design Intern

Flutterwave (Series D, Valuation \$3 Billion)

01/2022 - 07/2022 Lagos, Nigeria

Fintech company that provides a payment infrastructure for global merchants and payment service providers across the continent and globally

- Utilized front-end development skills, including HTML, CSS, and JavaScript, to transform designs into functional and visually appealing web interfaces.
- Successfully re-designed and launched the customers' web page within a tight deadline of 3 weeks, resulting in a notable 30% increase in user engagement.
- Worked closely with stakeholders to design and develop the corporate governance website, ensuring alignment with brand guidelines and delivering a polished final product.

Design & Innovation Intern

Mars Discovery District

2021 Toronto, Ontario

Not-for-profit corporation founded in Toronto, Ontario, Canada in 2000. Its stated goal is to commercialize publicly funded medical research and other technologies

- Collaborated with the development team to design webpages and create wireframes focusing on improving the unemployment rates for Canadian youth
- Conducted comprehensive focus groups and user research to identify pain points for youth and adjust the design of the job search app accordingly.
